

How to measure for a man's vest

- The man must wear a tight T-shirt (no suspenders or Lederhose)
- Don't measure your self
- Stand upright (don't look down), arms to your side
- Measure snug against the body

I need three measurements:

- chest (around the widest point of chest)
- waist (around the widest point of waist/belly)
- back length (from first neck bone to end of vest)
measure down the middle of the back; the vest should end 10 cm below Lederhose

We will add an amount for Lederhose and Suspenders to fit properly. Vests are not supposed to fit too tightly.

If your size is between two standard sizes, we will order the bigger size. There is a clasp in the back to make it smaller. If it is still too big, the vest is easily altered at the side seams. You have to try on the vest before altering (with Lederhose, shirt and suspenders).

Please tell us the article number of the item you like. Besides the green Miesbacher vest with red piping, other styles are also available.

Custom orders are also possible. You can choose the style (Miesbach, buttoned to the neck, double-breasted, or V-neck), the material (velvet, wool, polyester) and the buttons. Some ideas you can find on our website.

If a vest is in stock, we can send it directly. If we have to special order it, it will take around 8 weeks to make it.

Please let me know, if you have any questions. If you are not sure, just send me a picture while the man is being measured.

Looking forward to making you a perfect fitting vest! :)

Vroni
